

# CICD

Nguyen Phung Hung

The Benefit of CICD from technique language to business value:

Continuous Integration (CI): means using automation tools to build, test and merge code

**Continuous Delivery (CD):** is the practice of releasing software in short cycles, with greater speed and frequency

The Benefit of CICD about a revenue:

- You can release the feature quick more
- The customer always have more requirement to develop new feature, by using CiCd process in development you can adapt it easy
- When develop and after that you apply your software to product you can meet issue about license of software (package or enviroment) by using CICD you can easy to fix that so you can make a security good

The Benefit of CICD about a price:

- You can apply the automation testing in CICD so you can test fast and can reduce cost in process
- Auto deployment help you reduce time to deploy new feature and new code
- Sending alert make less time to notification
